TECHNICAL SKILLS

Languages: JavaScript, HTML5, CSS
Databases: SQL, MongoDB, IndexedDB
Libraries & Frameworks: React, jQuery, Bootstrap, Bulma
Tool Belt: Node.js, Express, RESTful APIs, MySQL Workbench, Git, Sequelize, Mongoose

PROJECTS

ORDER UP
GitHub: https://github.com/twopcz/order-up **| Project:** http://order-up-jkrtr.herokuapp.com/#/
A restaurant management system in which servers can take orders, and the back of house receives orders. When order is placed by a server inventory is updated dynamically and menu item ingredients are decremented accordingly from inventory. Managers are able to manage the restaurant menu, inventory, and employees; as well as track employee shifts.

MOTHRA PROJECT MANAGEMENT
GitHub: https://github.com/maximilianc88/Project-Planner-Application
Project: https://the-best-project-manager.herokuapp.com/
Mothra allows teams to track their project development progress. This app utilizes a myriad of technologies in an effort to provide users with good visibility of work status and develop more effectively. My role in this project was a hybrid role. I assisted in both backend development of SQL database and the development of API routes, as well as front end functionality JavaScript logic.

EXPERIENCE

Creative Marketing Manager   2016 – 2019
Dutch Bakers Associated   Gilbertsville, PA
  ➢ Proctored marketplace webinars and troubleshoot for clients with application issues
